

Airport State Funding

Application Instructions Fiscal Year 2023

Applications for FY 2023 Iowa DOT annual aviation grant programs are due no later than 4:00 p.m. Thursday, **May 26, 2022**. Public-owned airports are eligible to apply for vertical infrastructure and airport improvement projects. All necessary application forms can be found at: <https://iowadot.gov/aviation/airport-managers-and-sponsors/State-Funding/Airport-State-Funding-Application>.

Complete applications* that include the authorized signature of the airport sponsor should be emailed to shane.wright@iowadot.us. **No late applications** will be considered. Aviation staff will review the applications and prioritize projects based on the following criteria: airport role as identified in the 2020 Iowa Aviation System Plan, justification for the project, type of project, percent of local support, and whether the airport has multi-jurisdictional support.

A completed application package includes the following documents:

1. Funding Application Checklist and Funding Application Summary Sheet (Form 291114) – Use the checklist to ensure that all necessary information is included. The Funding Application should include current sponsor contact information, a short recap of desired projects in FY 2023 in priority order, and signature of the airports sponsor.
2. Project Data Sheet (Form 291115) – Complete one sheet for each project. Attach drawings and additional pages as needed to provide a **thorough** description and justification of the project so that the project is clearly understandable.
3. 5-year Capital Improvement Plan (CIP)(Form 291112) – If you already submitted a CIP with the federal pre-application, update to include requests for state funded projects.
4. Airport sponsor resolution or documentation from the sponsor that endorses the project and verifies availability of local matching funds. **Plan meetings to ensure they take place prior to the application deadline.** Reminder - Costs incurred prior to full grant execution are not eligible for reimbursement
5. Verification of planning (ALP for new construction, security plan for security projects, pavement maintenance program for pavement projects).
6. Verification that the city and/or county has an airport zoning ordinance. Include copy if it is not available on the airport page on the Iowa DOT website: <https://iowadot.gov/aviation/airport-information>
7. Minority Impact Statement required by 2008 Iowa Acts HF 2393.
8. Federally obligated airports are required to verify that their airport's based aircraft information has been updated and confirmed since December 1, 2021 at www.basedaircraft.com. Non-federally obligated airports must supply a list of based aircraft "N" numbers with their application.

Complete Applications are due: 4:00 p.m. Thursday, May 26, 2022

Please email completed application package to Shane.Wright@iowadot.us

Questions: Shane Wright 515-239-1048

Airport State Funding

Application Instructions Continued

Fiscal Year 2023

Airport development/maintenance projects: Eligible projects generally include planning and improvements related to enhancing airport safety, capacity, security and environmental concerns. Projects are eligible for up to 85% state share; however, local participation will be considered when prioritizing projects. Projects for new development must be shown on an airport layout plan, and the airport must have a security plan in place for a security related project. Examples of eligible projects:

- runway, apron and taxiway construction and rehabilitation
- airfield drainage
- airfield lighting and signing
- navigation and communication aides
- security related projects such as lighting and access control
- fuel facility installations and upgrades
- land acquisition
- **obstruction removal (make sure your approaches are clear 20:1)**
- planning such as airport layout plans (ALPs), master plans, land use and zoning, and multi-jurisdictional feasibility studies
- airport entrance signage (match 50% up to \$30,000 state share)

General Aviation Vertical Infrastructure (GAVI): Projects are eligible for up to 85% state share. Local participation will be considered when prioritizing projects. Eligible projects include construction and renovation of airport terminals, hangars, and maintenance buildings. GAVI grants are available only to general aviation airports. Routine maintenance of buildings and minor renovation projects are not eligible. Both new and rehabilitation projects will be considered each year. Include specific justification, such as a documented waiting list, with the application. The form is available on the Aviation Bureau website:

<https://iowadot.gov/aviation/airport-managers-and-sponsors/State-Funding/Airport-State-Funding-Application>
Maximum funding per project for FY 2023: new construction \$300,000 and rehabilitation \$125,000.

Commercial Service Vertical Infrastructure (CSVI): Eligible projects include construction and major renovation of terminals, hangars, and maintenance buildings at commercial service airports. Applications for FY 2023 should be for specific projects that the airport will initiate in FY 2023. The form is available on the Aviation Bureau website:

<https://iowadot.gov/aviation/airport-managers-and-sponsors/State-Funding/Airport-State-Funding-Application>

Land Use and Comprehensive Planning: If the city and county have older ordinances or do not have airport zoning, grants are available to assist sponsors in developing or updating current airport zoning ordinances. State share is 85% up to a maximum of \$25,000 for zoning ordinances. An agreement must be in place prior to planning activities taking place; however, there will be no reimbursement for costs until the new ordinance is enacted. Applications are available on the Aviation Bureau website at:

<https://forms.iowadot.gov/FormsMgt/External/291118.doc>. Submit with the annual application.

Wildlife Mitigation: Applications for funding are accepted throughout the year to provide assistance to airport sponsors in mitigating and removing wildlife from airports to reduce the potential for wildlife strikes. State share is 85% of the project costs. The form is available on the Aviation website:

<https://forms.iowadot.gov/FormsMgt/External/291116.doc>

Obstruction Mitigation: Applications are accepted throughout the year for safety and emergency repairs that arise during the year or are recommended by the airport inspector as a result of an airport inspection. State share is 85% of the project costs. The form is available on the Aviation Bureau website:

<https://forms.iowadot.gov/FormsMgt/External/291121.doc>

Airport State Funding

Application Instructions Continued

Fiscal Year 2023

Immediate Safety Enhancements (ISE): Applications are accepted throughout the year for when timely infrastructure repairs and equipment replacement makes it impractical to wait for the annual application process for other aviation grants. Goals of the program are to keep airports safe and operational when unforeseen and unbudgeted issues arise that require immediate attention. ISE grants which are subject to funding availability and will pay for 70% of a project, up to a maximum of \$10,000. Each project application must justify an immediate need to keep the airport safe and operational. Eligible projects include repairs for immediate safety enhancement like pavement blow ups, pot holes, and sink holes. In some situations, the repair or replacement of certain essential communication, lighting, and navigational systems including unicoms, PAPIs/VASIs, rotating beacons, windsock poles, and lighting system regulators may be eligible. Airports are encouraged to contact the Mike Marr (Airport Inspector) at 515-239-1048 or michale.marr@iowadot.us prior to obtain a full program description prior to applying. The form is available on the Aviation website:
<https://forms.iowadot.gov/FormsMgt/External/291119.doc>

Windsocks: Windsocks are available to public use airports and may be ordered through the annual application process or at any time by contacting Brian Kuennen at 515-239-1697 or via email: Brian.Kuennen@iowadot.us.

Air Service Development: Participation in the Air Service Development (ASD) program is limited to airports designated as commercial service airports in the Iowa Aviation System Plan that are currently receiving scheduled Part 121 domestic or Part 135 commuter service. Eligible projects may be funded up to 80 percent when funding is available for the program. Applications and instructions specific to the ASD program will be e-mailed to commercial service airports at the same time as the Airport State Funding Application.
