

IOWA DEPARTMENT OF TRANSPORTATION

To Office Bridges and Structures Date October 1, 2014
Attention All Employees Ref No. 521.1
From Gary Novey
Office Bridges and Structures
Subject Revision and corrections of the English Foreslope Protection Bridge Standard listed below.
(CADD M0399)

Electronic copies are available in the following Office of Bridges and Structures standard directory **W:\Highway\Bridge\Standards\Bridges** and on the Internet:

<http://www.iowadot.gov/bridge/standard.htm>

Standard 1007C has been revised to add 2 additional details which can be used when Revetment material is used to protect the berm. For both these situations Revetment will be used to cover the berm slope and the berm top ending at the abutment footing. One Revetment detail is the embedded condition and the other Revetment detail is the non-embedded condition where the Revetment is placed on top of the Grading Surface except at the berm top where the Revetment material will be embedded to provide clearance between the Revetment and the Beams/Girders.

For any questions, please check with Stuart Nielsen.
