
Project Description Tabulation

Design Manual
Chapter 1
General Information

Originally Issued: 02-04-11

Revised: 01-15-14

The Project Description Tabulation is meant to give contractors and inspectors a quick summary of the purpose of the project and a brief overview of the work involved. This allows field staff to make decisions consistent with the project intent when conflicts arise.

Most Project Descriptions will be limited to one or two paragraphs. The first paragraph of the Concept statement is usually a good place to start.

Refer to the Project Description Sheet Sample in [1F-4](#).
