

## 5.6 Freight Investment Plan

The NHFP was developed to improve the condition and performance of the National Highway Freight Network (NHFN). The NHFP includes a formula program providing funding to be used for freight-related projects on the NHFN across the country. Each state receives funds in proportion to the amount of funds a state receives compared to other states under all formula-apportioned programs (see Table 5.5).

A state may not obligate these funds unless the state has developed an approved freight plan which includes a freight investment plan listing of priority projects and describes how NHFP funds made available would be invested and matched. Table 5.7 documents the use of NHFP funds, National Highway Performance Program (NHPP) funds, and Primary Road Fund match.

Each federal fiscal year (FY), a state may obligate up to 30 percent of the total apportionment to the state for freight intermodal or freight rail projects. The Iowa Transportation Commission allocated NHFP flexible funds to the LIFTS competitive grant program for use on freight projects.

NHFP funds from FY 2016 to FY 2021 were awarded and/or authorized to the following projects:

- Council Bluffs Interstate Highway System (I-29/I-80)
- Davenport I-74 bridge replacement
- Iowa City I-80/I-380 interchange
- Multiple LIFTS projects (see Table 5.6)
