IM-NHS-080-1(419)3--03-78**

**Effective Date
July 16, 2013**

THE STANDARD SPECIFICATIONS, SERIES 2012, ARE AMENDED BY THE FOLLOWING MODIFICATIONS AND ADDITIONS. THESE ARE SPECIAL PROVISIONS AND THEY SHALL PREVAIL OVER THOSE PUBLISHED IN THE STANDARD SPECIFICATIONS.

120067.01 DESCRIPTION.

- A. Levee Unit Name:** Council Bluffs Levee Unit II, Sections 2 and 3 (Indian Creek Levee)
Missouri River - Council Bluffs Flood Protection
- Local Sponsor:** City of Council Bluffs, Iowa
- River Miles:** M0.00 to about M1.69
- Levee Stations:** 504+00 to 508+00
- Project Name:** Council Bluffs Interstate System – Segments 2 and 3
Reconstruction of I-29 / I-80
Pottawattamie County, Iowa
- B.** The Iowa Department of Transportation is proceeding with the reconstruction of the I-29 / I-80 West System Interchange (Segment 2) and the East System Interchange (Segment 3) as a part of the Council Bluffs Interstate System. The work for Segments 2 and 3 involves the construction of new roadway, bridge structures, roadway lighting and signing that will penetrate the earthen embankment and foundation soils of the Indian Creek Levee.
- C.** The levees affected by this construction include the Council Bluffs Levee Unit II, Sections 2 and 3, which were a part of the Council Bluffs Flood Protection System that was originally designed and constructed by the Omaha District of the U.S. Army Corps of Engineers (USACE) in the early 1950's. A portion of the interstate reconstruction will take place within the "critical area" of the levee, which is defined by the USACE as the area within 300 feet riverward and 500 feet landward of the levee.

The work covered by this Emergency Action Plan addresses the roadway embankments including ground improvements, sanitary sewer installation, sanitary sewer abandonment, and noise wall construction within the Indian Creek levee critical area. The ground improvements consist of below grade concrete columns that will be used to support the new embankments.

120067.02 CONSTRUCTION REQUIREMENTS.

A. Preparation of Emergency Action Plan.

Prior to construction, the General Contractor shall prepare and follow an Emergency Action Plan (EAP) which will address the requirements presented in this document and the procedures for high water conditions during construction. The EAP shall include emergency contact information, including cell phone and pager numbers of the project manager, project superintendant and foreman. The numbers provided shall be monitored 24 hours a day, 7 days a week.

B. Construction Limitations.

The General Contractor shall ensure that the proposed construction will not involve any additional landward or riverward excavations in the critical area that may impact the levee at any time during construction except as shown in the approved plans and specifications.

120067.03 CONTRACTOR'S EMERGENCY ACTION PLAN.

A. Contents of EAP.

1. The contents of the Contractor's EAP will present a detailed staging plan and all provisions in the Contract Documents so that the integrity of the levee system and its ability to provide flood protection will be maintained throughout the entire duration of construction. The Contractor's EAP shall be submitted at least 21 days prior to construction within the critical area.
2. The proposed construction will be performed during flood and non-flood event periods, including the work on the landside of the existing levee within the levee critical area. The potential does exist for the river to rise to flood level during the proposed construction and provisions will be in place to address this potential.

B. Procedures.

The following procedures shall be in place to address an emergency situation:

1. Daily Monitoring.

The water level in the Missouri River shall be monitored on a daily basis by the General Contractor and the Iowa DOT. The extended forecast of future river levels shall also be monitored.

2. Monitoring Agencies.

The river level shall be monitored through USGS and National Weather Service websites for River Gage - 06610000 Missouri River at Omaha, NE.

- http://waterdata.usgs.gov/ne/nwis/uv/?site_no=06610000&
- <http://www.riverwatch.noaa.gov/forecasts/OAXRDOAX.php>

3. Ceasing Operation.

Construction operations will cease in the event the river levels are within 5 feet of the published flood stage of 29 feet (Elevation 974.4 feet). The 100-year flood elevation at this location is 982.7 feet. The 500-year flood elevation is 984.0 feet. The City of Council Bluffs and the USACE representatives will be notified prior to resumption of construction.

4. Construction Equipment.

The General Contractor shall provide a list of all construction equipment that will be present throughout the duration of construction within the critical area. All equipment, construction materials and stockpiled soils will be removed in the event of high water and relocated to the landside of the levee during high water events.

5. Emergency Backfilling.

During excavation for the load transfer blanket, the construction of the ground improvements, construction of the drilled shafts, abandonment of the sanitary sewer, or construction of the sanitary sewer, if seepage is observed in any excavation, emergency backfilling shall be commenced. The rate of emergency backfilling shall exceed the rate of the rising river. Soil shall be used as emergency backfill. Concrete or soil can be used as emergency backfill for the ground improvements and drilled shafts.

120067.04 EMERGENCY CONTACT INFORMATION.

A. City of Council Bluffs.

Jeff Krist, P.E.
City of Council Bluffs, Public Works Dept.
290 Pearl Street
Council Bluffs, Iowa 51503
Phone: 712-328-4635 (office)
Email: jkrist@councilbluffs-ia.gov

Pat Miller, Operations Manager
Phone: 402-510-2700 (cell)

Chuck Pendgraft, Levee Superintendent
Phone: 402-510-3675 (cell)

B. IDOT Resident Construction Engineer

David Dorsett, P.E.
3538 S. Expressway
Council Bluffs, Iowa 51501
Phone: 712-366-0568
Email: David.Dorsett@dot.iowa.gov

C. IDOT District 4 Construction Engineer.

George Feazell, P.E.
2210 East 7th Street
Atlantic, Iowa 50022
Phone: 712-243-3355
Email: George.Feazell@dot.iowa.gov

D. Designer Contact.

Patrick H. Poepfel, P.E.
HDR, Inc.
8404 Indian Hills Drive
Omaha, Nebraska 68114
Phone: 402-399-1368
Email: Patrick.Poepfel@hdrinc.com

E. USACE – Omaha District.

Chris Horihan, P.E.
USACE – Readiness Branch
1616 Capitol Avenue, Suite 9000

Omaha, Nebraska 68102-4926
Phone: 402-995-2700
Email: Christopher.j.horihan@usace.army.mil

120067.05 METHOD OF MEASUREMENT AND BASIS OF PAYMENT.

All costs for complying with this special provision shall be considered incidental to the project. No separate payment will be made.
